

# TORONTO METRO

## HOME TO THE MOST ROBUST TRADING ECOSYSTEMS IN CANADA

Equinix's Toronto data centers are business hubs for 220+ companies. Customers can choose from a broad range of network services from 55+ network service providers. There is a dense concentration in financial services and financial exchanges and enterprises.

Toronto's data centers enable customers to be a part of one of the most robust trading ecosystems in Canada, encompassing alternative trading systems, market data feeds, risk management service providers, traders and banks.

Equinix customers have direct access to TorIX (Toronto Internet Exchange) and can interconnect directly to customers and partners in their digital supply chain.

### Toronto metro facilities

The Equinix Toronto metro International Business Exchange™ (IBX®) data centers consists of two buildings with 98,000+ square feet (9,125+ square meters) of colocation space. TR1 and TR2 are compliant with ISO 27001 for information security management systems and SSAE16 / ISAE 3402 SOC1 Type II and SOC 2 Type II, an international auditing standard for service provider locations. TR1 and TR2 are linked by FiberConnect and TR2 is linked to the Building Meet Me Room (BMMR) at TR1 via Extended FiberConnect.

To learn more about Interconnection opportunities in Toronto, visit the Explorer feature within [Equinix Marketplace](#).

### Equinix value by vertical

#### For network service providers

- Strong network and interconnection helps decrease latency and improve performance and reliability of content delivery.
- International carrier presence including China Telecom, Reliance Communications and Bharti Airtel Ltd.
- Connect with Google Cloud, Microsoft Azure and Office 365 accessible via Equinix Cloud Exchange Fabric™ (ECX Fabric™).
- TR2's unique position enables cross connects to TR1 and provides access to diverse paths out of the metro, removing TR1 as a SPOF in the network.

Equinix TR2 IBX data center exterior

#### For enterprises

- Performance Hub® to enable next-generation wide area network (WAN) architecture for a secure and highly reliable connectivity.
- On-demand and direct access to multiple cloud providers and multiple networks via ECX Fabric.

#### For cloud and IT services providers

- Ability to interconnect directly to 220+ companies collocated with Equinix in Toronto.

#### For content and digital media

- Interconnect with top content delivery networks (Akamai Technologies, Limelight Networks, etc.) to improve latency and help improve user experience.

#### For financial services

- Access to a strong financial ecosystem with connections to Nasdaq Canada Global financial exchange and TorIX.
- TR1 is a carrier hotel, site of a strong financial ecosystem.
- Access to low-latency routes to financial ecosystem sites in Chicago and New York.
