With more than 100,000 cabinets deployed and over 15 years of experience in data centers, our experts can provide advice for all custom and standard solutions, including cages and cabinets, power distribution, cable management, security and accessories.

Leverage Our Experience

Take advantage of Equinix's unique perspective and deep expertise with data center equipment, vendors and International Business Exchange™ (IBX®) interoperability. We're well aware of the challenges you face trying to balance complex delivery schedules, juggle vendor relationships, keep costs reasonable and maintain focus on the future. So why not let our experts handle it?

Single-Vendor Simplicity

When you let Equinix source the infrastructure equipment for your data center, you not only save time and money, you simplify the entire sourcing process. Equinix takes care of all aspects of vendor management, procurement and delivery. You'll enjoy single-invoice simplicity and the convenience of working with a single vendor, and you'll appreciate how Equinix's unparalleled expertise can help you acquire equipment that meets your needs and performs consistently and accurately within our data centers, avoiding potential interoperability issues. And should any issues arise, you'll only have one vendor to call for resolution.
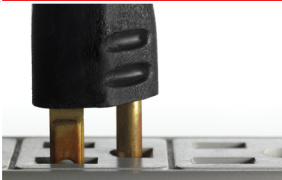

Synchronized Purchasing

Rather than having equipment arrive at random intervals, take advantage of Equinix's synchronized approach, so equipment arrives when it is needed and access is available. Equinix tracks the entire process, from procurement to delivery to the customer's cage, we will handle all the hassles of opening tickets. Let Equinix streamline the purchasing process and eliminate the headaches of coordinating multiple vendors and deliveries.

Working with one vendor means one invoice, a single point of contact for all warranty issues, simplified scheduling with one vendor instead of many, and a streamlined delivery process.

Equipment Categories

Cages and Cabinets	Power Distribution	Cable Management	Security	Accessories
