

# POWER YOUR DIGITAL TRANSFORMATION WITH EQUINIX AND MICROSOFT

Together Equinix and Microsoft enable and accelerate hybrid cloud deployment

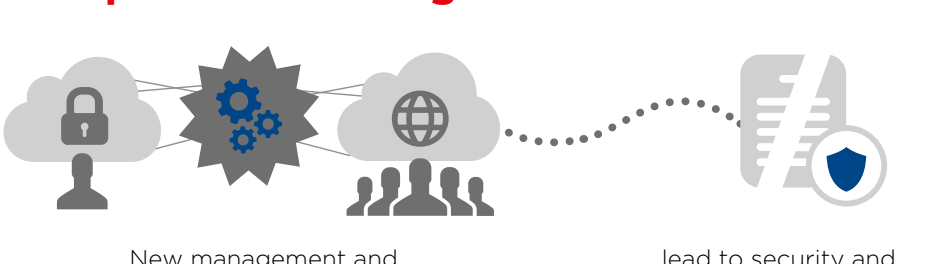

- Reliable
- Instant
- Direct
- Scalable
- Flexible

## Helping you overcome the challenges of achieving interconnectivity

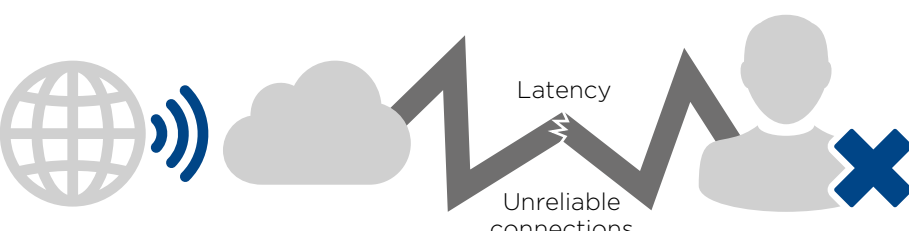

In today's interconnected era, where cloud dominates and enterprise models are interdependent, interconnecting with Microsoft means negotiating challenges that include:

### Compliance challenges

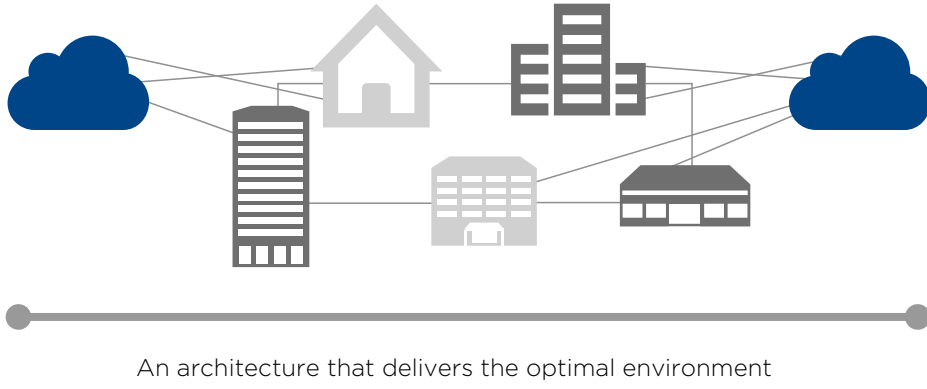

**70%** of executives see security as biggest issue in migrating to cloud<sup>3</sup>

### Connectivity challenges

**89%** of enterprises say poor app performance has negatively impacted work<sup>1</sup>

### Architecture challenges

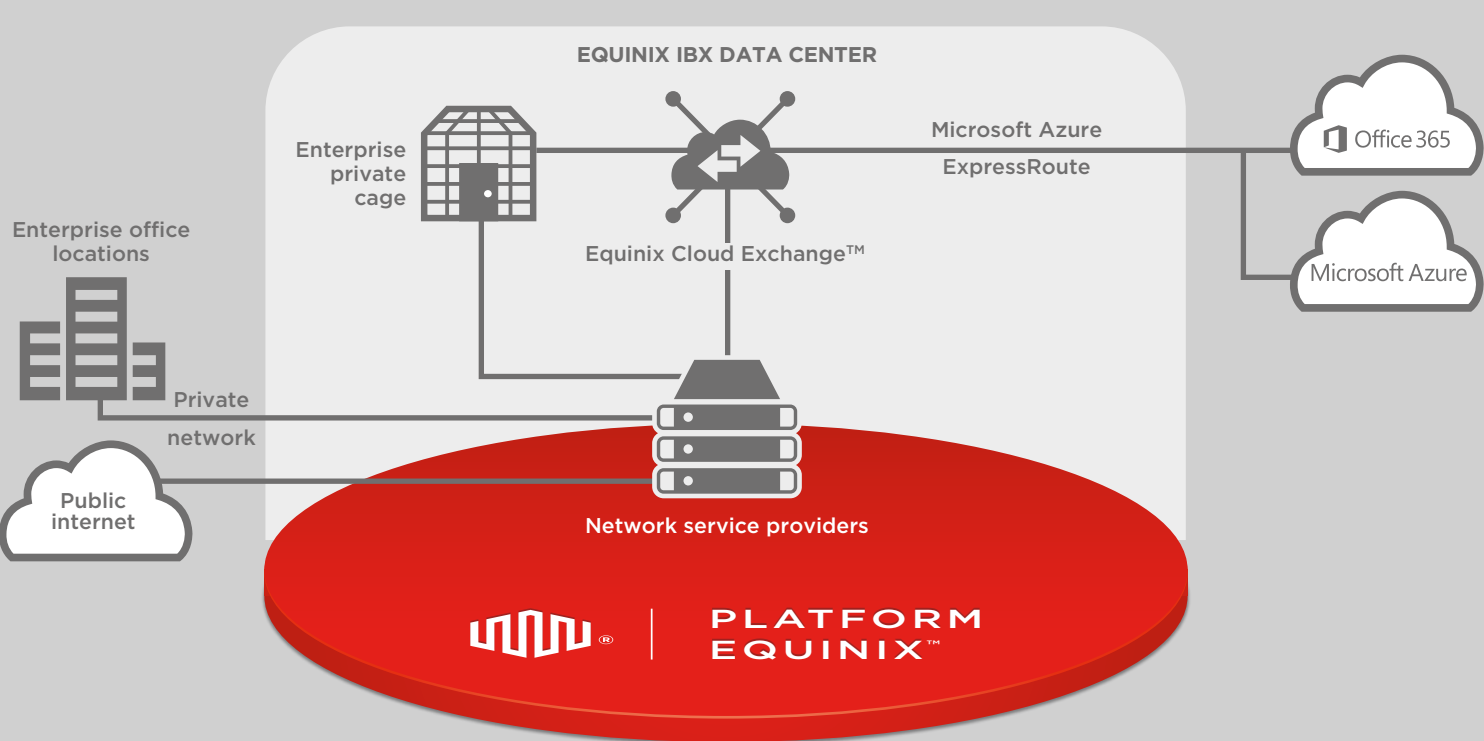

**71%** of enterprises have hybrid infrastructure<sup>2</sup>

## Equinix enables full integration between cloud services and demanding internal applications

- Low latency connectivity**
  - Capability to operate demanding enterprise applications and workloads
  - Enhanced application performance and improved compliance
- Data at the edge**
  - Move your data closer to the people, locations and applications that need it
  - Better performance and more scalable architecture
- Hybrid cloud ecosystems**
  - Simplifying your transition to hybrid architecture
  - Easy integration across diverse ecosystems

## The elements of advanced interconnectivity

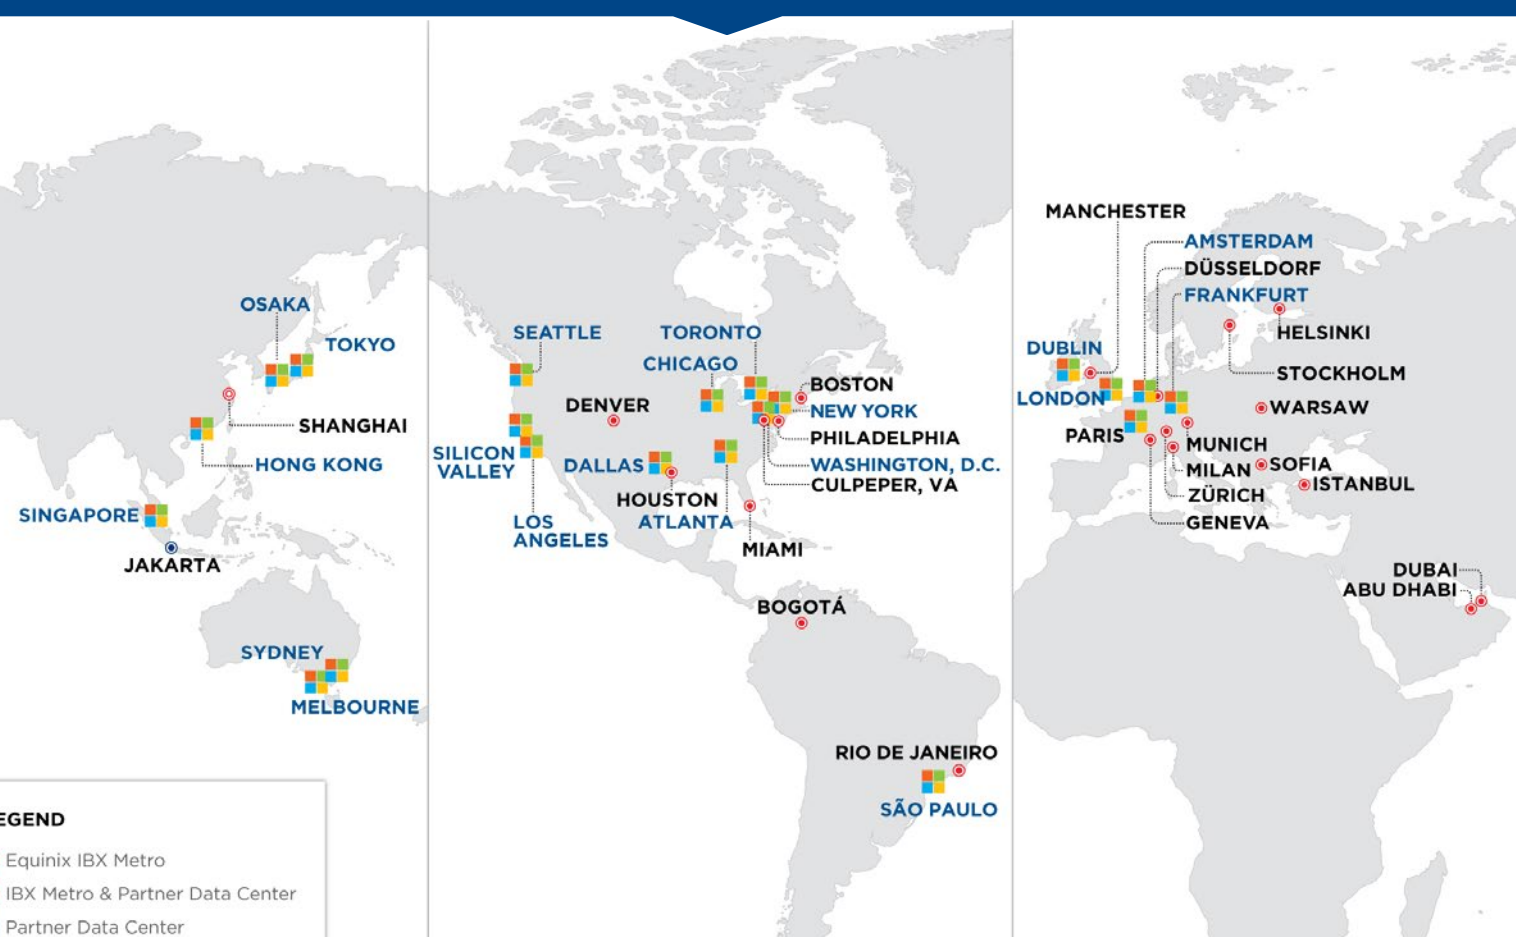

- Microsoft ExpressRoute**  
Private connections between Microsoft Cloud platforms and your infrastructure.
- Equinix Cloud Exchange™**  
Agile, secure, instant interconnection to Microsoft Cloud.
- Equinix IBX™ Data Centers**  
State-of-the-art, carrier-neutral colocation space and carrier-dense interconnections, and much more.
- Equinix Performance Hub and Equinix Data Hub**  
Giving you the ability to efficiently deploy resources at the edge.
- Equinix Professional Services for Cloud**  
Practical guidance and proven solutions to help you optimize your data center architecture and migrate to hybrid cloud solutions.
